Professional Summary

Dedicated Software Developer with 6+ years of specialized experience in full-stack development for SaaS platforms supporting law enforcement and public safety agencies. Expertise in designing, securing, and maintaining high-availability systems that adhere to strict government data integrity and security standards. Proven ability to translate complex legislative and operational requirements into scalable technical solutions.

Work Experience

Software Developer | MdE-Inc | 2015 – Present

- Public Safety SaaS Architecture: Lead development for training and operational SaaS platforms used by law enforcement leadership and 911 dispatch centers.
- Security & Compliance: Implement robust security controls and ensure data integrity within systems supporting public safety agencies, maintaining uptime for critical services.
- Full-Stack Development: Architect front-end and back-end modules using .NET and Adobe ColdFusion, ensuring system reliability in high-pressure environments.
- Database Engineering: Manage and optimize large-scale MSSQL databases, focusing on performance tuning, stored procedures, and secure database management.
- Requirements Analysis: Collaborate directly with public sector clients to gather requirements and troubleshoot complex technical issues, ensuring solutions are production-ready and compliant.

Projects

OSRS Luck Tracker | Next.js, TypeScript, Supabase, PostgreSQL, Java

osrs-luck-tracker.vercel.app

- Built a full-stack app that scores how lucky Old School RuneScape players were on every collection log drop, comparing kill count against drop rates and every other tracked player.
- Wrote a Runelite plugin in Java that reads the in-game collection log, backed by six Supabase Edge Functions with token registration and anti-cheat checks.

KeepTrack | React, Vite, Supabase, TanStack Query, Zod, Vitest

keeptrack-red.vercel.app

- Built a shared win/loss ledger for friend groups, with scores that update live for every member through Supabase Auth, Realtime and Storage.
- Added a demo mode backed by an in-memory Supabase client, so anyone can try the app without an account.

Nexus | JavaScript, HTML/CSS, Supabase

nreaver1.github.io/nexus

- Built a campaign manager for a D&D group (party roster, multi-currency treasury, loot and session logs) with a public read-only view, admin-only editing, and Node tests for the calculations.

Technical Skills

- Languages & Frameworks: Adobe ColdFusion, JavaScript, Object Oriented Programming, Node.js, .NET, HTML5, CSS, XML.
- Database & Analytics: MSSQL, Data Visualization, Data Analytics, Relational Database Management.
- Public Sector Infrastructure: System Administration, Security Control Implementation, RESTful APIs, Active Directory, Network Support, AWS.
- Professional Tools: Azure DevOps, Git, Technical Documentation, Software Troubleshooting.

Certifications

- Google Cybersecurity Professional (2026)
Verify: [Network Security](#) · [Python Tasks](#) · [Manage Security Risks](#) · [Linux / SQL](#) · [Threat Assessment](#) · [Detection & Response](#) · [Cybersecurity Foundations](#)
- Adobe ColdFusion Certified Specialist (2024)
- Responsive Web Design / HTML 5 Certified (2020)
